

FACT SHEET

COMPANY: PURE SOLUTIONS NA, LLC

Company History:

PURE Solutions is committed to provide healthier environments through improved indoor air quality for the hospitality industry and commercial settings. PURE Solutions is a privately owned company with international headquarters located in Williamsville, NY.

The management team has substantial experience and an outstanding track record in the Indoor Air Quality (IAQ) industry over the past 17 years, with tens of thousands successfully completed IAQ projects, in all types of commercial buildings, cruise ships and Navy vessels

PURE Solutions opened its headquarters in 2004 with a strategic focus on the hospitality industry. Now that the hospitality industry has begun, PURE technology will soon be available in other applications. PURE Rooms are now available in over 50 hotels and conference centers throughout the world.

To assure that the company meets hospitality industry objectives, PURE Solutions commissioned the Cornell's Survey Research Institute Hotel to conduct an independent survey of hotel clients. In addition, extensive R&D and related field trials were performed through the State University of New York at Buffalo Industry/University Center for Biosurfaces.

PURE Allergy Friendly Rooms:

PURE Solutions has innovated a system that produces PURE rooms, an allergy-friendly room which results in indoor environments that have been treated to remove 98% of bacteria and viruses. The PURE room concept utilizes special purification techniques whereby each room is treated comprehensively to remove allergens and irritants from all surfaces, fabrics and air flow.

The innovative and rigorous conversion process designed by PURE Solutions ensures that air handling units are deep cleaned and sanitized then equipped with the company's specially made Tea Tree Oil Cartridge. PURE Tea Tree Oil is an all natural antiseptic and disinfectant gel that maintains the sanitary conditions created during the initial conversion process. Soft surfaces are cleansed and sanitized with PURE Clean to eliminate irritants and contaminants that can trigger allergies and cause discomfort. The room next undergoes a one time high ozone shock treatment to kill any remaining living organisms and their associated odors. A bacteriostatic barrier called PURE Shield is then applied on all surfaces to prevent the growth of bacteria.

To maintain these ideal conditions in the room, a state-of-the-art air purification system is installed, creating air quality that averages four times cleaner than the threshold for asthma patients. This system is registered by the FDA as a Class II medical device. Special micro-fiber hypo-allergenic pillow cases and mattress covers are used in the room to reduce allergies triggered by dust mite allergens.

PURE Hotel Rooms:

Although just under four years old, PURE Solutions has rooms spanning across the United States from New York City to Beverly Hills, and many points in between. Most recently, PURE Solutions has expanded its operations to Dubai, Singapore, Malaysia, China, the Caribbean and the Scandinavian countries.
